Mountain Weather Forecast

Snowdonia National Park

Forecast valid from 00:00 on Tuesday 23 Aug 2022 until 23:59 on Wednesday 24 Aug 2022

Forecast Issued on Monday 22 Aug 2022 at 14:15

Confidence: High confidence in general theme of the weather. By this we mean often cloudy with some rain in the next few days and a hint of things improving into the bank holiday weekend. However, low confidence in the detail of any rainfall.

Headline for Tuesday 23 Aug 2022: Generally cloudy with patchy rain and showers at times. Some brighter spells at first to the north and east of high ground and perhaps some brighter breaks returning later in the day.

Mountain weather hazards on Tuesday 23 Aug 2022

Forecast for Tuesday 23 Aug 2022

Weather: The cloudy theme with patchy drizzle will continue from Monday evening through the early hours of Tuesday until after sunrise, with fog over the summits. Cloud will begin to lift somewhat by mid-morning, with some breaks to the north and east of the summits, however rain will become more widespread and a little heavier for some in the park, most likely in the south. By afternoon rain will once again become lighter and patchier, likely interspersed with some brighter spells especially later in the day. This should continue until late evening when a further band of showery rain drives north-eastwards across the region, bringing locally heavy bursts and some more low cloud into the overnight period.

Chance of cloud-free hill tops above 800m: 10% becoming 40% in the afternoon. Lowering again into the evening.

Low Cloud and visibility: Throughout the park, there will be widespread low cloud in the morning, with cloud bases down to 300m to 500m at sunrise. This will lift and become patchier through the morning. By afternoon there will still be some cloud around the summits, with bases of approximately 550m to 800m, mostly likely in the far west. Visibilities will be very poor within any cloud/ fog. Visibilities largely good within valleys.

Meteorologist's View

Although will feel humid throughout the day in the valleys tomorrow, it will feel much cooler on the summits so extra clothing is advised. Visibility wil also be impared at times particularly in the morning near the summits.

Forecast for Wednesday 24 Aug 2022

Weather: Heavy periods of rain expected through the early hours of Wednesday, which will likely carry on until mid-afternoon after which it should ease. Cloud will lift heading into the evening.

Maximum wind: west to southwesterly winds – maximum of 15-20mph, with gusts of 20-25mph on the summits.

Chance of cloud-free hill tops above 800m: 10% becoming 30% in the afternoon. Perhaps increasing to 60% in the evening.

Low Cloud and visibility: Widespread low cloud until mid-afternoon when the rain eases. This will bring bases down to 300m-500m across Snowdonia. Visibilities will be very poor within any cloud/ fog. Visibilities poor within heavy rain. Improvement expected into the evening.

Temperature: **Valleys:** Plus 14 rising to Plus 17 Celsius.
At 800m: Plus 10 rising to Plus 13 Celsius.
Freezing level: Well above summits.
